

Meeting called to order by Club President, Willy MacLean, W1LY, at 1900.  
There was a short discussion of financial affairs.

John King, WA1ABI, made a presentation on the W1SYE repeater. A new antenna and new hardline has been installed. Next, John show the members a list of additional problems that need to be fixed, such as adjusting the volume, reducing the squelch tail, and others. He has volunteered to make the need changes.

Captain Steve Lynch of the Portsmouth Fire Department made a presentation on CPR and the use of a defibrillator.

There was a discussion of Field Day. Willy explained that traditionally a group of hard core amateurs, some of whom are club members, make a serious and concentrated Field Day exercise. Their goal is to get the highest score possible, and thus exclude other members who may not be experienced contest operators. This group calls themselves "The 49ers".

Willy then proposed to have a second Field Day effort composed of those club members who would enjoy a less competitive, more social and relaxed event. Ted Wrobel, W1GRI, will chair this endeavor and asked the attendees to let him know if they are interested in participating.

The meeting was adjourned at approximately 2030.
