

Ocean State Emergency Communications Alliance Net OSECA RECAP

This alliance was created through a cooperative discussion with local EMA HRT leaders who are eager to create an opportunity for Amateur radio operators in RI to practice and coordinate their ability to serve as Emergency Communicators.

The Ocean State Emergency Communications Alliance Net occurs bi-monthly on the 1st and 3rd Tuesday at 7 PM (1900) on the KA1RCI repeater system and is open to all licensed operators.

Next NET Dates: Dec 2nd and 16th/Jan 6th and 20th

The purpose of this net is to promote interaction and cooperation between the organizations and the individual Amateur radio operators involved in Emergency Communication in Rhode Island. We seek to provide a free exchange of information among those organizations and individuals, and also to make other Amateur radio operators aware of opportunities to serve as Emergency Communicators

Any licensed Amateur is welcome to participate in this net. You do not need to be affiliated with any emergency management agency or disaster response organization to check in.

Beginning in January 2015 we will consider restricting the Coventry Emergency Communications Net to the 2nd and 4th Mondays of the month.

I encourage you to join us and check in on both Nets.

Coventry HRT members- the chart below reflects our original Baofeng radio programming and the corresponding Memory Channels. Those located in Coventry Memory #006 will probably be your best bet. For those radios that have been reprogrammed refer to the frequency number itself.
