### ARTEN ( 1-10 GHz) Amateur Radio Training Experiment Network

- No activities since last month but goals were provided to the ARRL NE section STEM and Youth recruitment group via groups.io
- Serverless Audio CQ system under development.
- Spring is coming and more outdoor work will be planned

ARRL NE section: Spectrum Protection and Use group happenings

- ARRL EMI (Electromagnetic Interference) experts are organizing a path for reporting radio interference from power systems and other sources.
- Meeting held last Friday: K1YBE and KC1NEK attended.
- Example situations are being reviewed like a leaking power transformer in FL.
- Mesh has a role to play as nonHam WiFi signals may need monitoring and sources of interference located.
- Assistance will first be provided as a checklist and recommendations on contacts. Equipment for identifying and locating sources is being planned so that a response team can be activated if needed.
- As reported previously, Power companies are often cooperative as this can help in their preventive maintenance activities.

Scouting (John KC1KOO)

- Jamboree On The Air (JOTA) Oct 14-16 in Glen Park
- Ft Adams Jamboree Oct 21-23
