QRP Corner

QRP Corner is a short monthly discussion of things related to QRP

QRP is “Low Power” and is usually defined as 5 watts or below

Why QRP?

- Relatively inexpensive (kit \$50+ assembled \$200+)
- Usually small and light weight
- Small battery powered
- Usable for POTA/SOTA/IOTA, etc.
- Challenging!

Pebble HF

www.pebblehf.com

- 5 Watts Output
- 20-meter band CW or SSB
- Simple 14 soldered components
- Built-in Mic and CW Key
- Can power from USB-C for 1 watt

Great first-time kit
50 Min build time!

tests

Who's in his log???

Go to www.pebblehf.com, scroll down, and look for “Pebble HF – Notify Me when ready”

How to Purchase

Buy Soon at shop.hamradioduo.com

Coming Spring or Early Summer 2026

Pebble HF is coming spring or early summer 2026, for under \$50. Sign up below to be notified when it is available.

Pebble HF - Notify me when ready

Please provide your contact information below to sign up to be notified when the Pebble HF is ready for general release at less than \$50.

We have sold out of the Early Supporter versions. This version was sold at \$100 for an early version to test and help get the project off the ground. We may do another Early Supporter batch if there is enough interest.
